A: I think you have a problem with the libatlas-devel package. The following error in installed atlas-devel package: Breakage potential: high The system could be affected by the following problems: compatibility issues atlas::blasfq failed to load:... module atlas has no symbols atlas::atlas_atlasblasfq failed to load:... module atlas::dgels failed to load:... compatibility issues ATLAS_LIBRARY, PIC, KERNEL_OBJECTIVE_C At least it's from a cpp-vs-c++ discussion: Bz#1129155 But if you want to ignore all the problem messages you can do it: rpm -i --nodeps -Uatlas-devel Bz#1062153 If you have any dependencies on the atlas-devel packages you can try to install them first and then you can use the --nodeps option.
