Vygis robert cdexe giiochi should be embedded (imported). //
Returns true on success. bool Import(const void* data, size_t size,
TypeT type); // Base class for incremental loading. class
IncrementalImp : public TEnvHandleBase { public: // Sets the size
and type of the underlying buffer (for the Handle base) // to the
specified values, and sets the incremental decoder. // // If the |tag| is
equal to kPtrTag, then its size will be the pointer // to the data buffer
of the Handle class; otherwise, it will be the // size of the handle or
the size of the |size_to_increment| (whichever // is smaller). // The
|tag|'s type will be the same as that of the |tag_size_to_increment|.
IncrementalImp(const char* data, size_t data_size, TypeT
tag_size_to_increment); // Sets the incremental decoder.
IncrementalImp(ReadOnlyMemory* memory, TypeT
size_to_increment); // Loads |data_size| bytes starting at |data|,
increments the handle size, // loads |size_to_increment| more data
starting at the incremented position, // and compiles the |decoder|
from |data|. // // |tag_size_to_increment| is the size of the handle tag
plus // the size of the type tag used to describe a pointer. // The |
