Sir, Madam, I am not a kannada speaker, and am a member of a muhammedan dargah Jaunpur Maharashtra, India. I find it difficult to read kannada, so if I want to learn the language, then I prefer to be trained on Telugu. I came across this website and I think it is of great help. I would like to know the meaning of two words which I don't understand, what are they meaning? I am wondering if you could provide me with Tamil songs of Ayyappa and Eka maha Deva and songs sung during temple festivals including Ratha Yatra. I can make any of the songs available for you if you provide us with translations. The versions I have got are in Kannada, Tamil, Malayalam, Hindi, Telugu and other major languages. You can write the lyrics in your own language. Currently, they all come from one language (Kannada). So you are using Kannada version of this software. If you want Tamil version, then there is a Tamil interface. You can also convert to other languages like English, Telugu and other regional languages. More information can be found in the help section . The other features are: * You can write the lyrics in your own language. Currently, they all come from one language (Kannada). * You can copy the lyrics from other sources (eg. web sites, books etc) and paste them in the page of Kannada language. * You can add tags to the lyrics. * You can remove the underlining from the lyrics. * You can write the name of the person who wrote the lyrics and give attribution to the lyrics to the correct location. * You can add the specific verse and the proper order to the verses. * You can add titles to the songs. * You can select the songs from the prikaranam or pelakaranam based on set themes and specific events. * You can write the name of the person who composed the song and give attribution to the lyrics to the correct location. * You can color the lyrics on the page. * You can add frequencies to the songs. * You can set the frequency to be normal, fast or slow depending on your requirement.
