If you want to find tags for your games, especially if you have a game with many entries, you're looking at scrolling through long and complicated tag lists. Some tags are easy to find (like developer, publisher or scopes); others (like game classes, platforms) are buried even deeper. Only 1 of these might be right to show up at the top, of course, but I would be hard pressed to guess which one. In the end, I just noticed that the tags were missing and added them manually.
