

hi all, i just wanted to create this thread to share my new website which is steamstats.com. i created this site because i wanted to have one place to get all my data to, especially for my steamscapes. i have over 1.7 million steamscapes and i wanted a single place to get them all to make it easier for me. you can now download all your steamscapes in one zip file for you to get them all into the steamscapes folder. steamstats.com can be used to keep track of the games you play, your games library, and how many hours you've spent on steam. the app also has a ton of features and you can customize the appearance to look the way you want. the game stats feature of steamstats.com is very useful for any type of game, however, its the feature that i most use because it also lets you see your games library of the games you have on steam. from there you can check out all your games and see what you've played and how many hours you've spent on them. this feature is really useful for people who have a lot of games on their steam library. you can also create a list of your most played games so you can check out your top games. if you want to get a head start, you can download any or all of the games on steamstats.com for \$0.99 in the "releases" section of the store. when you're done, you can then remove the release from the app section. this should give you the best start to your new steamstats.com experience! in addition to the stats feature of steamstats.com, there is also a feature called steamscapes. you can make your own custom steamscapes and then share them with your friends. if you select to make a custom steamscape, you can then upload it to steamscapes.com. you can then share it with other steamscapes users or even make it public and share it with all the people on steam.
