the plaxis 3d fc module can be used to solve problems of structural analysis and analysis of engineering, and can effectively solve complex finite element analysis and structural analysis problems of complex projects in detail.the simulation can be performed using tetrahedron elements of 2, 5, and 10 knots, and the maximum element size is approximately 1/100 of that of the classical structural analysis programs.its stability is considered from the point of the field variable, and it can be used when a large displacement is expected. plaxis therm is a software package for analyzing the finite element of soil stability and transformation, and in addition to the stability of the structure, thermodynamic characteristics such as the heat transfer coefficient and heat transfer coefficient of complex geotechnical structures can also be analyzed with this software.in this module, calculation using the most improved method can be performed, and a large number of space elements can be used, and can be optimized.the simulation can be performed using basic numerical integration methods.the program is used to analyze structures by finite element methods (fem), determine the stability and risk of the structure, and analyze the load transfer characteristics.this program is used to define artificial structures and soil in different modes, and separate analysis of each mode is possible. plaxis plaxflow 2d is a finite element model, and in addition to the finite element method, it can also be applied to the solution of partial differential equations.many types of equations can be solved at the same time.the program can be used to analyze behavior of turbulent flows, stream flows, and flows within pipes, and to determine pressure loss, wall friction, or reaction force from the surface.it can be used to analyze channel flows, fluid-dynamic flows, and water-dynamic flows.the program can be used to analyze convection flows in fluids.the program can be used to analyze thermal conduction, and the program is used to analyze the heat transfer characteristics of soil 5ec8ef588b
