## Commandos Behind Enemy Lines Download !LINK!

first, move the driver into the sapper's uniform, and blow up the trackway. then, use the driver to get the sapper across the river. if you need to blow up any enemy guards, use the green beret to kill them. when you have reached the western gate, blow it up and gain access to the spy's uniform. take out any guards and go down the road. lure the enemy guards to the northern entrance and take out the guards who have guard tower. use the sniper to kill the guards in the shooting range. blow up the road to take out the guards on the other side, and blow up the tank. the key to this mission is to run up to the machine gun emplacement and start killing the men there, preferably before they notice you. the sound of the machine gun will bring the rest of the guards running, and once they've moved you need to kill them before they kill you. at this stage you should have a few grenades to hand, as well as a few weapons. once you've cleared the emplacement and are behind the tank, your men can get out of the jeep and move to the nearby armour. your sniper can pick them off, but if he misses you can stay still and let them walk over you. when they're all dead you can get your men into the jeep and drive it to the nearest boat to take you to safety. start the mission off by picking up the green beret and going to the north-eastern corner of the camp. your goal is to get behind the main gate and use the green beret to take out the men there. once the guards are dead use the green beret to follow the river, where you'll meet a diver. drive him to the riverside and kill the guards in the camp. your sniper can take down the sniper on the rooftop and the green beret can eliminate the guards on the rooftops.

## Commandos Behind Enemy Lines Download

start the mission by shooting off a couple of rounds to lure the guards over. the alarm goes off, but only a few guards come over. clear out the area above - you can use your pistols to a certain extent, but don't fire near the enemy barracks by the train tracks. you can, however, fire near the

---

smaller barracks close to your original position as there are only a few men in it. use your sniper to take out the two machine-gunners on the top island. next, move both diver and driver down to the tank in the corner. once you have possession of the tank you can take out as many guards as necessary in order for your diver to

---

ferry the sapper over to the bottom island and collect the explosives. once you have them you can blow up the bridge and escape in the truck. a very simple scenario for a first time cd-rom player, this one. a mixture of good game design and good game play. the more simple the scenario, the more there is for the player to figure

---

out. the more difficult the scenario, the more there is to do in the game. there is only one mission, but it is extremely well thought out and has several obstacles to overcome. a good rpg, a good stealth/action game, and a must for anyone who has played commandos and commandos 2. well, i downloaded this

---

yesterday and played it for a couple of hours, and was annoyed to find that i'd downloaded the wrong one. commandos 2 is better than commandos. which is a good thing, because it is the only game that was originally released for the pc i own, and it looks very good. the game is fun and it's a good example of a "roguelike" game. it can

---

be completed in about 20 hours, and i had a hard time getting through it. the graphics are good, the controls are good and the game is fun. the fact that it only has a map of one city is also a plus. i would suggest to people to try it out before they buy. it's a very nice game and i hope it gets more exposure. game is fun, feels like a real game and

---

i recommend it.
