Free Download Game Astrobatix Full Version

astrobatix is a simple shooting game with elements that remind of the classic arcade space invaders. you are dropped in space, where

your only goal is to destroy enemy space ships by shooting. you have basic attacks and the ability to shoot and dodge enemy fire. your ship is able to protect against all types of enemies because it can freely move around on the screen, not being forced to move in limited segments. gameplay : 1. left click. default attack.

nothing else. fires automatically when the left mouse button is pressed. can not be pressed by holding the left mouse button down.

2. right click. fires automatically when the right mouse button is pressed. controls: 1. default attack: left click. can be fired even when the left mouse button is held down. each enemy

you destroy gives you bonus points that can be redeemed for upgrades, special effects, or other cosmetic items. with the number of missions the single-player mode offers, even if you get stuck only for a short time, you'll discover a large number of possibilities to test your skills. the game's map, however, is a bit small

and offers very little variation, which only adds to its simplicity and durability. in most missions, you will take one of two possible paths: either you either take the shortcut or you take the longer one. both paths contain very similar elements, though. astrobatics is the popular space flight game, where a player has to blast his

way through over 50 missions in one game. in astrobatics, you can fly a ship and fight your enemies in space. you can use the control stick to move the spaceship, and you can also activate your weapons and shields by pressing the corresponding buttons. you can also use missiles, lasers, and turrets to protect yourself from

bullets, bombs, and laser beams. the game features different bosses, which often attack your spaceship. you have to destroy their armored body to continue.
