Al Qanun Fi Al Tibb Pdf Download

MA Khan - 2015 - "Kitab al-Qanun fi-al-Tibb," commonly known as "Kanon. Medicinae" is the most important of his medical works and, at the same time, the most thorough and accurate. It was first printed in Constantinople in 1487 in the Majma un Nikah (Book of Diseases) in six volumes. In 1538 it was reprinted in Venice, in five volumes. It was later translated into Arabic, Persian, and French. The late medieval scholar and philosopher Avicenna (Ibn Sina) translated it into Farsi, and it was printed in Bukhara in 1633. Translators and publishers, as a rule, did not always follow the Arabic original. dd2bc28256
