Virtual Serial Port Kit 5.4 Full

1.2.10 is available! The main change in this version of Virtual Serial Port Kit is support for Clients over USB 3.0! It is also fully compatible with Windows 8.1 (no changes required for the Windows application user!). A new, simpler and faster installation wizard has been introduced. Unicode support has been improved and bug fix releases are scheduled. 1.2.6 is available! This release brings new operation modes, support of LCD displays and improvements in the USB stack. The firmware and kernel have been completely refactored. Second version of Virtual Serial Port Kit is now using the tiny libusb_*.wince.dll. This is a straight drop-in replacement for the DLLs shipped with Virtual Serial Port Kit 1.2.6 and requires no code changes for the application developer. 1.0.6 is available! This is the first major release of the Virtual Serial Port Kit. Host controller and power management has been completely redesigned. New serial port management utilities have been added to the application. This release introduces the new Virtual Serial Port Kit Dashboard to the Windows user. Desktop version and firmware version 1.1 bring a set of new functionality and performance improvements. Amiga emulators such as AmigaDOS and emuedmin were significantly improved. Custom devices support such as USB to RS232 was added. A big set of bugs fixed. Windows 10 and RS232 emulation were improved. ChakraCore 1.1 introduced, bringing many performance improvements, new features, and new plug-ins which are functional in Virtual PC. Also, a lot of bugs were fixed. ZDoom ported to this version. A lot of memory issues fixed. SecBef588b
