Even if you .Q: Workbench - link to DTMN I'm wondering whether it's possible to link to dtm.mydomain.com, or dtm.myotherdomain.com, or dtm.myotherdomain2.com with the Workbench's Built-in Server. I tried adding the following code into the Site Settings of my WCM-enabled site, but this doesn't seem to work: dtm:{site url}/a/dtm/{dtm host}//xml Any ideas, or is it impossible? A: Here's a solution that will allow you to host multiple DTMN servers, while still allowing you to access your DTMN through a single Workbench site. Create an admin site, and use the built-in.NET DTMN Server that comes with Workbench. Add the site to your DTMN server in the admin console, and configure it to forward to your other DTMN server with a rewrite rule. The rest is the same as with regular DTMN.
