What's New in the?

ESET Win32/Filecoder.AR cleaner scans the computer for any traces of the dangerous trojan that hijacks files on a target computer. Once it finds it, it will erase the damage it has caused. All encrypted data will be decrypted and the infected files will be restored to their normal state. Once you have got ESET Win32/Filecoder.AR cleaner installed, you can use the built-in Scanner tool to find out if it has any suspicions about any of the files on your computer. When ESET Win32/Filecoder.AR cleaner finds traces of the virus on a target computer, it will offer to delete them, restore the infected files to their original state and remove all traces of the infection. Once ESET Win32/Filecoder.AR cleaner is finished, you will be asked if you want to delete it too. Select Yes to delete the trojan, and no to keep the program on your computer.
