- Use Tab to cycle through the character selection option.
- Remove words from your typing with a double-click.
- Scroll words in text with a double-click.

- Remove words from your typing with a single-click.
- Go to the next/previous character with a single-click
- Start/stop/pause/restart typing with a double-click
- Cut/copy/paste your text with a single-click
- And much more!

Installation: The Master Key program is an installer, so you will need to run it in an X11 based operating system like OSX or Windows. If you have a copy of OSX, it is a simple drag-and-drop to install. If you have a copy of Windows, you will need to install X11 for Windows before running the program. It is free and easy to do. Once installed, you can simply run the program from the System/Utilities folder of the program file (NOT from the installed program folder).

Keyboard Preferences: Master Key supports four different keyboard schemes: QWERTY, Dvorak, Colemak and Colemak-IBM. Master Key automatically detects and configures itself for your keyboard scheme. To use it, select "Keyboard Options" from the master key menu and select your keyboard scheme. Note: The Colemak keyboard layout is only available for OSX users.
