What It Does: The Library tool allows you to use, organize, and search your color schemes and items you have created. It is useful for creating, replacing, or replacing missing items and is also great for storing custom brushes. You can also change the display size of the Layers window for optimal/minimal visual impact of your layers. **What It Does:** You can use the level or Fade setting on this tool to add a selective transparency to your selected image in a number of ways. You can fade the intensity of light from white to black, the intensity of darkness from black to white, and even the hue of the color. For an even more complicated fade effect, you can use the color wheel tool in the Fade tool. **What It Does:** The Layer Mask tool removes any parts of an image that you aren't interested in. Generally, it is used to remove areas of a photo that you don't want to see on your finished piece. It can be used to add highlighting and shadowing to parts of your image. 933d7f57e6
