Masha-Mash By Vishal Kumar 9 Dec 20 SlideShare is probably the best presentation tool out there. It's clean, free, and simple to use. With SlideShare, you don't have to be a professional. You can easily upload your presentation, create a professional looking landing page, and create attractive and stunning slides for your presentation. All you have to do is upload your presentation. Pros • Easy to use • Simple to create • Has some great features Cons • The process is a bit time consuming Description The problem with the process is that it takes some time. 2edc1e01e8

Slidestory Publisher Crack + Free License Key

Slidestory Publisher is a fun and easy way to create and share beautiful slide presentations. Slidestory Publisher is a fun and easy way to create and share beautiful slide presentations. The program lets you create beautiful presentations with simple drag-and-drop gestures. All you have to do is to choose the images you wish to display, the slides you want to show them on and the text you want to write. From there, you can record your voice narration, and then you can turn your presentation into an interactive story! Whether you are a parent who likes to tell beautiful stories, a person who works in sales and wants to sell a house efficiently, or a student who needs to create an interesting and innovative presentation, Slidestory Publisher comes to provide simple options to do so. It's an accessible and easy-to-use application that helps design different photo slideshows, using your built-in microphone to narrate impressive stories about your dream vacation, the background of the house you sell, or the content of the project. Uncomplicated and user-friendly layout The program offers a straightforward interface that displays the added pictures one after another, the story information, a slide viewer along with the record and play buttons. It is recommended but not mandatory to create an account on the publisher's webpage so you can share your work and access creations from different users. Insert and organize favorite pictures and record stories To get started, all you have to do is drag and drop the images into the panel and input the project details, such as category, title, description, tags, as well as slide one caption, tag, and optional summary. You have the option to insert files from the computer in BMP, JPG, JPEG, TIF and PNG formats. To record your voice, just press the corresponding button and begin narrating. Make sure your microphone is properly set so you won't encounter any issues. Plus, you can preview your recording before publishing it by using the play button. Look for errors and configure general settings Another useful function is the cue card that helps you recite each slide by typing relevant notes of what you are going to say. The app lets you rotate images by 90 degrees clockwise and counterclockwise, and manage the overall presentation look. Last but not least, the story can be checked for errors, which are displayed in a new window along with descriptions. From the menu, you have the option to test the microphone's settings and manage the user properties.
