The toolbar is set to path mode when a pen tool is selected, and you can see that there are no restrictions on how you can draw the paths. The path editing toolbox also lets you undo a stroke segment, a path segment, the entire path, or an entire stroke. There are many other new tools to help you edit paths and strokes for better results. In this process, for example, we are going to create a path inside the lightest green path, and then shorten and move it. Select an area inside the path, release the Path cross selection tool (or left mouse button), then select Stroke to add a groove to the path outside the stroke. Click the Magnify tools icon (V) in the Tools panel while the Path cross selection tool is selected, and toggle it to Dynamic. This will show a selection of all the paths. Double-click the green path to select it. Hold down the Shift key and select the dark green path. Move the dark green path, close it with the Shape Close tool (F7), select an outside area in the Path cross selection tool, and invert it to match the light green path inside, and then use the Path Fill tool (L) to fill the inverted area. Finally, move the green dark area to adjust it and select it with the selection tool. From the Effects menu, choose Layer Styles, click the Layer Styles icon, and set the stroke style to Overlay. Click the OK button in the dialog to apply the new layer style. The artboard, or the set of layers included in an image, continues to remain a fundamental part of PS, and it is a basic element that everyone has to pay attention to. So, as we know the artboards are the interface between the layers and the image, and also they are the canvas where every element, texture, and graphic is put.
