What if the problem is not with the tool itself, but rather a misaligned tool window? It happens to me all the time. Sadly, the "Fix tool window" command can't always repair these issues. If you have a workaround, let's hear about it. Lightroom CC is a photo manager that is designed for speed. So it's the perfect choice for working with extremely large libraries. Additionally, it's also a camera raw converter that can open RAW files when connected to a computer.
